

# **RHP Computer Applications**

## **6-1 Internet Shopping**

---

This week, you will use the Internet to find a variety of information. For assignments 6-1 and 6-2, you will take a quiz (by using the link on the assignment page) and submit your answers. All answers can be found by looking on the Internet (using search techniques you used last week).

Assignment 6-3 is shopping assignment. You must find the best possible price for certain items – you will email that assignment to me.

Assignment 6-4 is a mapping exercise. You will take a quiz to receive your grade.

Good luck!
