

In this challenge, you will construct a worksheet that anyone can use to convert between the English and metric systems or vice versa. Your worksheet should end up looking just like the example below.

	A	B	C
1	Conversion Worksheet		
2	English Value	Conversion	Metric Value
3	1	inches-centimeters	2.54
4		feet-meters	0.00
5		miles-kilometers	0.00
6		ounces-milliliters	0.00
7		quarts-liters	0.00
8		miles/hr-meters/sec	0.00
9			
10	Metric Value	Conversion	English Value
11	1	centimeters-inches	0.39
12		meters-feet	0.00
13		miles-kilometers	0.00
14		milliliters-ounces	0.00
15		liters-quarts	0.00
16		meters/sec-miles/hr	0.00
17			

Column A is your input column. The user should be able to put any value in this column, and instantly see the conversion in column C. The type of conversion is listed in Column B, and your formulas for figuring out the conversion will be in column C.

Use the Internet or other source for finding the conversion factors needed. Email me the finished Worksheet at rhp@denovodental.com. The subject line for this assignment is **compapp 14-2 lastname**.
